CREATING POSITIVE SPACE

DESIGN

Branding and Design are crucial elements of our industry. Our detailed and contemporary design will lift your exposure to a higher level. We also integrate our design into your company's overall communications strategy. Proj-X Design is a one-stop shop design and production company.

Our intensive in-house education program keeps our designers and print production team right on top of the latest design and production options. Our world-class team, using state of the art software and equipment will work with you to progress ideas from inception to delivery.

PRODUCTION

Our experienced and qualified trades people cover many disciplines that include carpentry, joinery, painting and finishing, metalwork, electrical and transportation.

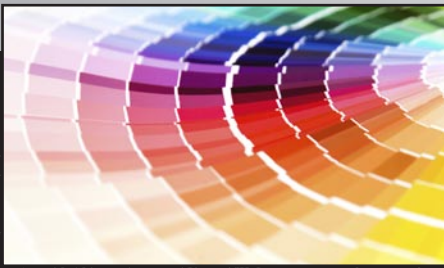

Our facility is equipped with cutting edge equipment to deliver the highest quality product to our clients.

Although the specifics of your project may vary, our standards do not. High quality production and professionalism are the hallmarks of Proj-X Design.

CREATING POSITIVE SPACE

GRAPHICS

At Proj-X we have over ten years experience with large format, offset, flatbed and screen-printing plus posters, catalogues & flyers.

We offer the best quality outcomes for any application. Our in-house graphic production department includes wide format printers with dye, pigment and solvent inks, laminators & vinyl cutters.

Our Graphic Production Team can produce the graphic content for any project to ensure a seamless integration between printing and building.

PORTABLES

High quality pull-ups and portable displays sturdy enough to withstand the rough and tumble of travel and couriers, yet eye catching. These are the elements to consider when choosing a portable exhibition product.

We have worked with all major brands and suppliers to supply the right product and regularly work with pull ups, pop ups, X-stands and panel based systems.

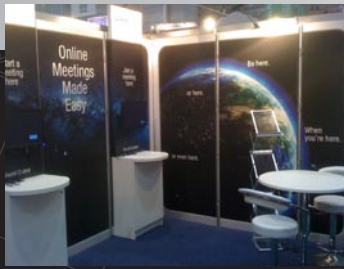

We also have a range of custom-made portable solutions specifically tailored to your needs.

CREATING POSITIVE SPACE
