

Artwork Setup & Specifications

You can supply artwork in either MAC or PC format. Proj-X prefers to receive print ready Adobe PDF files but can also accept Adobe Illustrator and Photoshop files for large format digital printing. Please make sure all fonts are outlined (within Illustrator), all transparency effects are flattened (with Document Raster settings set to 200dpi at final print size) and the print area is setup with crop marks and at least 10mm Bleed.

All artwork is to be supplied press ready at recommended resolution of 200dpi. Artwork is to be saved at 100% (actual) size. If the physical size is too large then please save at 25% of the final artwork size.

Proj-X can accept InDesign files for multiple page documents such as brochures or booklets. Please package all InDesign files with MAC fonts and linked images.

Please note that Proj-X does NOT accept artwork saved as Microsoft Office (Word, Excel, Powerpoint), Corel or Quark Xpress files.

The table below lists programs and formats Proj-X accepts.

Programs	Versions	Formats
Adobe Illustrator	CC or earlier	Best for large format printing, EPS files with all images placed & text outlined
Adobe InDesign	CC or earlier	For brochures and booklets only!
Adobe Photoshop	CC or earlier	PSD, EPS, TIF, JPG (high res image minimum 200dpi, 400dpi if includes text)
Adobe Acrobat Professional	Professional 11 or earlier	PDF (single page files only, high res output)

If Colours and Colour Matching is Important

All artwork should be created and supplied in either CMYK or Pantone (PMS) Solid Coated colours. Our digital printers are set as close as possible to match 4 colour process printing. **If colour consistency and accuracy is important, please supply a Pantone (PMS) Solid Coated reference number.** Proj-X can colour match to Pantone (PMS) Solid Coated colours or to a physical colour proof.

If colour matching to a proof is required, a fee of \$120 per hour + GST will be charged.

Sending Artwork

Proj-X can accept files via email upto 25MB is size, for larger files we recommend sending the art through online transfer sites, by CD/DVD's, Memory Sticks or Portable Hard Drives.

Proj-X can download your artwork files from your FTP sites or from online File Transfer Sites like Dropbox, WeTransfer or Hightail. Please call either Ian or Andrew at Proj-X if you intend to send files and please follow up with an email to artwork@proj-x.com.au to let us know files are being sent. We will let you know once we have downloaded and if there are any issues.
